Dated: 27 November, 2014

Dear Sir,

I would like to apprise you that the Govt. of Uttar Pradesh under the Civil Aviation Department is running an Aeronautical Training Institute for the last 23 years wherein diploma in Aircraft Maintenance Engineering in Mechanical & Avionics streams is being imparted. This institute is approved by the All India Council for Technical Education (AICTE), Govt. of India, Board of Technical Education, U.P. and the Director General of Civil Aviation (DGCA), Govt. of India. Initially, in this institute diploma in Aircraft Maintenance Engineering (Mechanical Stream) was started in the year 1991 with the intake of 20 students. In the year 2009, the intake of the students was increased from 20 to 30. After successfully running the Aircraft Maintenance Engineering (Mechanical Stream) for approximate 20 years, in the year 2011 another course in Aircraft Maintenance Engineering (Avionics Stream) was started with the intake of 30 students. Now, the diploma in Aircraft Maintenance Engineering in Mechanical & Avionics Streams with the intake of 30 students each is being provided by the Board of Technical Education, U.P. and also we are in the process to start the diploma in Helicopter & Powerplants with the intake of 30 students.

2. The admission for the above courses is made through a competitive examination conducted by Joint Entrance Examination Council, U.P. The eligibility criteria for this diploma course in Aircraft Maintenance Engineering is 10+2 PCM with minimum 50% marks in Physics, Chemistry & Mathematics. The syllabus of the said courses is designed in such a way that it enables the students to pass the Aircraft Maintenance Engineering Licence examination conducted by Directorate General of Civil Aviation (DGCA), Govt. of India. Due to its very high quality of education, the institute has very special position in the field of aircraft maintenance engineering and has become a premier Aircraft Maintenance Engineering Institute in India.
3. It is pertinent to mention here that it is the only institute in India run by a state government which has world class infrastructure and facilities for all round development of its students. Since this institute is located in the campus of Civil Aviation Department, U.P., where maintenance of state owned aircraft is done, our students get the advantages of doing practical training on various aircraft used and maintained by State Civil Aviation Department and, thus, also gain the highly technical knowledge in the field of Aircraft Maintenance Engineering. No effort is spared to groom the students and create positive attitudes by equipping them with all qualities to make them an asset to whichever organization they will join. That's why, the alumni of this institute occupy high positions in National Carriers, Scheduled/Non-Scheduled Airlines, various MROs and other organisations and performing very well in their respective organisations.

4. As a part of our continuous strive to being the top Indian Aviation Organisations to our institute, I would like to request you to consider the possibilities of conducting your recruitment drive at our institute for Aircraft Maintenance Engineers. It is needless to say that the process of campus selection is the best way to recruit the quality manpower in any progressive organisation. Now, more than ever, the emphasis is on Institute-Industry Interaction and the institute by conducting the campus recruitment programme and the industry by participating in the same, are bound to find it mutually beneficial. Every year, we look forward for placement of about 30 students in Mechanical stream and 30 students in Avionics stream.
5. It is indeed with great pleasure we cordially invite your esteemed organisation kindly to send a team of experts to this institute for conducting campus recruitment to recruit those students who, I strongly believe, will become an invaluable asset for your organisation. At present we are in the process of finalizing of campus placement schedule for our students passing out in June, 2015. It would be highly appreciated if you can send in advance the schedule of visit to our institute so that mutually convenient dates can be fixed accordingly.
6. Looking forward to hear from you soon. We wish for lasting fruitful relations and great experiences.

With regards,

Yours faithfully

(Devendra Swarup)
